

ROBINSON AMIANDA

SOFTWARE DEVELOPER

00100 Nairobi | robinsonamianda5@gmail.com | [Website-Portfolio](#)

SUMMARY

I'm a software developer with experience building applications using React, JavaScript, HTML, CSS, Python, Flask, and MySQL for database management. I specialize in front and backend development, ensuring seamless user experiences and robust functionality.

PROFESSIONAL EXPERIENCE

Gold Leaf Valley

Jan 2024 - May 2024

- Designing and implementing both the client-side and server-side for web applications.
- Creating, managing, and optimizing databases, ensuring data is stored and retrieved.
- Building and integrating APIs (e.g., RESTful) to allow the front end to communicate with the backend.

Internship, Intern Career

Jun 2022 - Aug 2022

- Ensuring web applications are optimized for various devices and screen sizes.
- Improving the speed and performance of websites by minimizing load times.
- Translating design mockups and wireframes into functional, visually appealing interfaces.

PROJECTS

1. Car Rentals [Link](#)

A web application for booking and managing car rentals with real-time availability and price.

2. E-commerce [Link](#)

An online shopping website offering a seamless buying experience.

3. Insurance Dashboard [Link](#)

An online shopping website offering a seamless buying experience with product listings.

SKILLS

Front-End Development

Database Management

Version Control

Back-End Development

API Development

Web Design

EDUCATION

Bachelor in Software Engineering

Sep 2019 - Sep 2023

Strathmore University

- Relevant coursework in Software Design and Project Management.

Software Development Bootcamp

Moringa School

- Relevant coursework in both Frontend and Backend Development.
